Clinic Appointment System

Product Goal

Build a web application where patients can find doctors, view their availability, and book/manage appointments.

Users

Patient

Can:

- Register
- Login
- Logout
- View doctors
- Search doctors
- Filter doctors by specialization
- View doctor details
- View available appointment slots
- Book appointment
- View my appointments
- Cancel appointment
- Update profile

Doctor

Can:

- Login
- View profile
- View appointments
- Accept appointment
- Reject appointment
- Mark appointment as completed
- Manage available slots
